PROUDLY MADE IN ITALY

MULTIDRY 90

Vertical oven

High performance, low vibration

It dries water-based or solvent based coatings that require medium to long drying times. Particular care has been dedicated to the structural design of bar-trays to ensure maximum load capacity, thus optimizing oven performances in terms of durability and stability. The structure made of robust painted steel profiles is completely insulated. Lifting and lowering of the trays is through mechanisms and chains. High performance without vibrations. Practical controls placed on the electrical panel. Simple airflow management.

- ✓ Ideal for drying water based and solvent based coatings with long drying times
- ✓ Wide modularity, version 2-3-4-6 stages, with zones optimization for efficient drying
- ✓ Bar or belt trays version
- ✓ Bar trays size: 3600 – 5500 mm
- ✓ Belt trays size: 5500 – 7000 mm
- ✓ Working width: 1300 or 1600 mm
- ✓ Pieces capacity from 1 to 8 production hours
